WHITELIST & BLACKLIST SOFTWARE

Document Code	02e-TC/TT/HDCV/FSOFT
Version	3.3
Effective date	20-Jan-2026

FPT Software
ManhPT14 2026-07-22 22:00:18

INTRODUCTION

1.1 Purpose

This document describes in detail the list of software that is allowed to be used in FSoft and that is prohibited.

1.2 Scope

This document is applied in FPT SOFTWARE and Branches, Representative Offices, Subsidiary Companies under directly Company

1.3 Definition

Terminology	Explanation
BlackList	Software(s)/application(s) that are prohibited to use within the organization. The Blacklist includes software identified as posing security risks, violating compliance requirements, or conflicting with organizational policies. Installation or use of Blacklisted software/application is strictly forbidden and may result in disciplinary action.
Whitelist	Software(s)/application(s) that are approved to use within the organization (with license(s) upon request) The Whitelist contains pre-approved software that has been vetted for security, compliance, and business requirements.
Others (Not Listed)	Any software or application not explicitly listed in either the Whitelist or Blacklist is classified as "Not Listed." These software/applications are not permitted for use by default. Users who require its installation or utilization for legitimate work purposes must submit a formal request through the internal approval process. This request must be reviewed and approved by: + The Customer (if applicable, for customer-controlled environments or project-specific systems), + The Business Unit Leader (BUL) of the requesting unit, and + The Information Security Manager (ISM) of the organization. Only after obtaining all required approvals may the software be installed or used on company systems or project environments.
BlackList Extension	Browser extensions/add-ons that are explicitly blocked by the organization due to security risks, compliance violations. These extensions cannot be installed or used on company devices/browsers. The Blacklist Extension contains browser extensions and add-ons that pose security threats, privacy risks, or violate organizational policies. Installation or use of Blacklisted extensions is strictly prohibited and will be automatically blocked by endpoint security controls. Violations may result in disciplinary action.
Location	Defines the geographical scope where the software list (Whitelist/Blacklist) is applicable. + Global applies worldwide without geographical limitation. + Location-specific entries (e.g., China, EU, US) apply only within the specified region and are subject to local regulatory and compliance requirements.

1.5 Roles and Responsibilities

No	Role	Responsibilities
1	The IT Department	IT maintain and update the whitelist and blacklist of software/application. The whitelist and blacklist is approved by IT Head.
2	User(s)	- Understand requirements specified in this documents, Users must follow the standard and can have direct access to the services that they have been specifically authorized to use - use authorized software in the Company's white list only - Unlisted software or blacklist is strictly forbidden. Do not use any scanning, monitoring, attack, hacking software.

Whitelist
